

JOEL FRANCO NAVALES

Web Developer

About Me

Hi! I'm a passionate front-end web developer with a strong foundation in HTML, CSS, and JavaScript. I specialize in creating clean, responsive, and user-friendly websites that bring ideas to life in the browser.

With a keen eye for design and detail, I love turning static designs into interactive and engaging web experiences. Whether it's a personal portfolio, business landing page, or creative project, I enjoy building websites from the ground up using just the core technologies of the web.

I'm always exploring better ways to write efficient code and improve user experience—one line of HTML, one style of CSS, and one function of JavaScript at a time.
